Observational Quote

Courage is not the absence of fear, but rather the judgement that something else is more important than the fear.

-Ambrose Redmoon

2024 Basic Safety Decals

In most parts of the country winter's cold and ice have settled in for the next few months. If you operate in the deep south or southwest, you may escape the worst of this, but even in the warmest climates, there are cold snaps and chilly conditions.

Because much of the country is below freezing for part or all of the day, this is the time of year when most contractors handle major rebuilds, repairs and reconditioning. Frequently, new decals are one of the finishing touches after such work. But cold weather presents challenges for decal installation. Outside conditions can be harsh, and even shop temperatures can be pretty chilly. So, make sure all of your machines have the correct safety decals on them, ensuring your operator's safety and your equipment maintains appropriate fluid levels!

[Click here for some tips on your cold weather decal installations!](#)
